- Welding and Fabrication
- Advanced Assembly
- Specialized Metal Works
- Metal Parts for Critical Applications

**SPEED  
QUALITY  
PRECISION**

One of the most trusted  
metal sheet components supplier  
to world class companies.

---

**Deep SMC is one of the fastest emerging players offering complete solution in sheet metal fabrication domain. Established in 1990, the company is emerged as one of the leading and trusted vendor for all types of metal fabrication works, supplying precision metal products in any volume – from low prototypes to full batch production running in lakhs.**

---

### **3 M EMPHASIZES**

We emphasize on 3 M (Man, Machine and Method) with the objective of delivering outstanding customer service through continuous improvement and excellence in different areas. Our customer's contracts are handled by qualified talented sheet metal engineers and skilled craftsmen having rich industry experience in their respective fields. We have invested in latest machines and tools and keep an eye on latest introduction in metal fabrication field. Quality is deep sited in the functioning of Deep SMC. We have stringent quality processes and standards being practiced at all stages of products cycle. The company employs a dedicated Quality Team consisting of a Quality Manager, Quality Engineer and Technicians at different levels of product screening, production shop floor and final QC.

### **SINGLE SOURCE FOR ALL PRECISION SHEET METAL FABRICATION**

We at Deep SMC have invested in the latest production technologies and capacity to ensure that any sheet metal fabrication requirement, no matter how distinct, is met precisely. Deep SMC is one of the most resourceful metal fabrication companies in *India*. We are a full service manufacturing company serving to customers catering to a wide range of applications, from precision sheet metal to heavy plate in variety of material like Aluminum, Brass, Bronze, Copper, Steel, Tin, Titanium.

### **BEYOND METAL FABRICATION**

Manufacturing precision sheet metal components is our partial strength. One of our core expertises is offering proactive design services to our customers for making more ergonomic, cost saving, resource optimizing components. Over the past couple of years we have concentrated on developing new high-tech products for various segments of Industries and developed some critical import substitutes for its customers. As we look back, we find that it has been a very fruitful, rewarding and progressive years.

Our dedication is mirrored in our wide spectrum of products, each of which has been borne out of a unique need of demanding customers. With innovation, diversification & vision, the pillars of our philosophy company operates with the belief that there is no resting for us in today's highly competitive world economy.

What sets us apart is the fact that we share ownership of projects. We share the responsibility of delivering quality work well on time and with zero defects. Just the way our customers possess, we too share the ownership of executing any task entrusted upon us. No wonder, most of our customers are associated with us from more than 15 years. And why not as each employee of the company is primarily a customer service executive.

### WHY DEEP SMC?

- Managing projects with utmost professionalism with primary focus on Quality, Speed and Precision.
- Highly Qualified Engineers and Technicians
- Unique combination of world-class services at competitive prices.
- Transparency in Dealing with Customers
- Manufacturing Facility Area: 60,000 Sqft.
- Stringent Quality Processes and 3 Level QC
- Using World-class Machines, Tools and Softwares
- Average Customer Retention Duration: 15+ Years
- Known for one of industries fastest execution of orders.

---

No matter whatever the metal fabrication requirement is, we have capabilities to meet it precisely. We are a team of dedicated individuals. We ensure that all our customers get dedicated attention and resources without equating them with the size of requirement. With more than dedicated 15 specialized engineers, Deep Industries is one of those few companies which can cater to complete metal fabrication requirement irrespective of its size and delivery time frame. Even from a rough drawing sketch, we can offer services of making prototypes and give it desired finishing suiting to our customers requirement.

### A FEW OF THE PRODUCTS WE MAKE

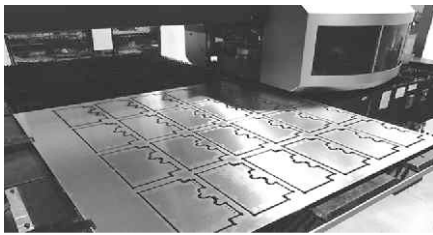

- Sheet Metal Stamping Parts
- Dip Draw Components
- Textile Machinery Parts & Textile Engineering Parts
- Automotive Stamping Parts
- Metal Enclosures
- Machined Components
- Lab Furniture
- Laser Cutting Works
- Laser Cutting Art Works
- Sheet Metal Enclosures for Security System
- Electrical Switch Gear Fabrication
- Sheet Metal Assembly
- Aluminum Enclosures with Wall Mounting Flange
- Rack Mounting Enclosures
- Panel Fabrication
- Turret Punching Facilities
- Precision Components Aerospace Sheet Metal
- Specialized Cable Gland
- Special Cable Trays
- TV Wall Mount Stand

Your Partner for  
Complete Sheet Metal Fabrication.

- Laser Cutting
- CNC Punching
- Stamping
- Sheet Metal Bending
- Welding and Fabrication
- Advanced Assembly
- Specialized Metal Works
- Metal Parts for Critical Applications

**POWER PRESS MACHINE**

Capacity: 5 - 200 Tons

**HYDRAULIC DIP DROP PRESS**

Capacity: Upto 200 Tones

Fabricating metal components catering to varied application sectors.

**Irrigation**

**Solar Panels**

**Automobile**

**Lab Furniture**

**Textile**

**Defense**

**Automotive Parts and Accessories**

**Office Furnishing**

We are where our customers are.

---

**Companies from Middle-East, USA, Europe and Asia have entrusted upon us with all their mettle fabrication tasks. We are slowly yet firmly expanding our reach globally.**

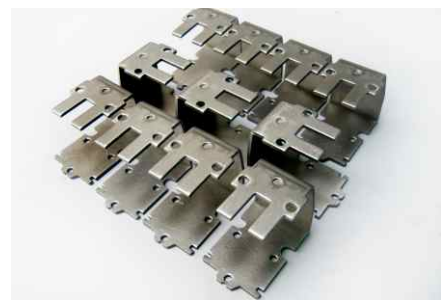

---

- Trusted Vendor to Customers in USA, Europe, Canada, South Africa, India
- Recognized as the Best Vendor by Schneider and ABB
- Catering to more than 1000 Customers

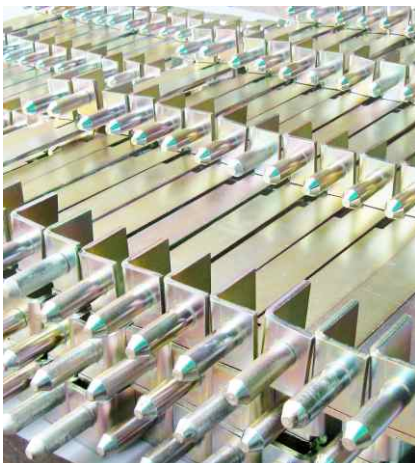

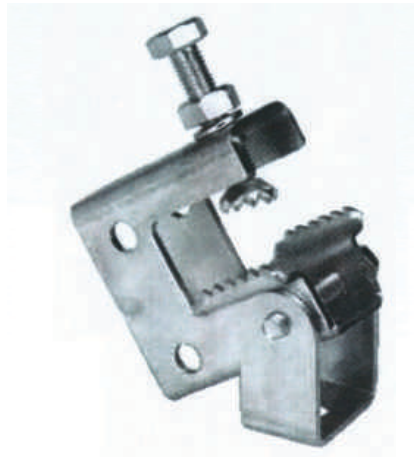

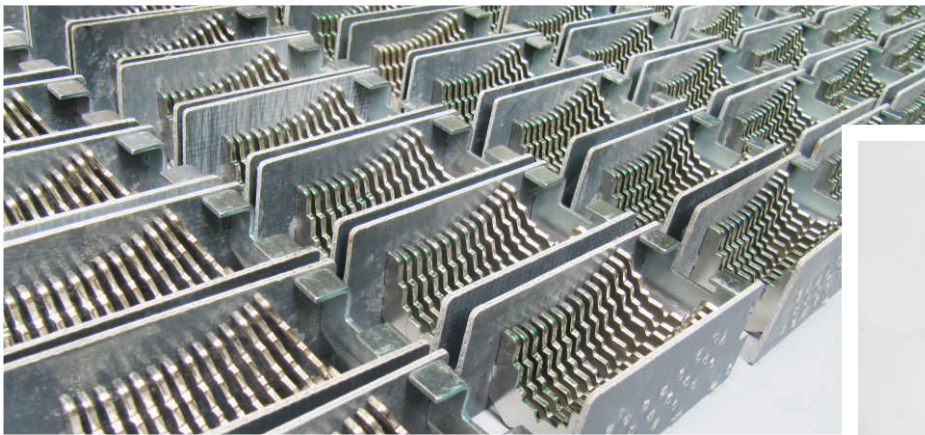

Supplying precision metal components in any volume –  
From low prototypes  
to full batch production  
running in lakhs.

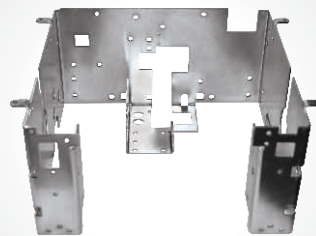

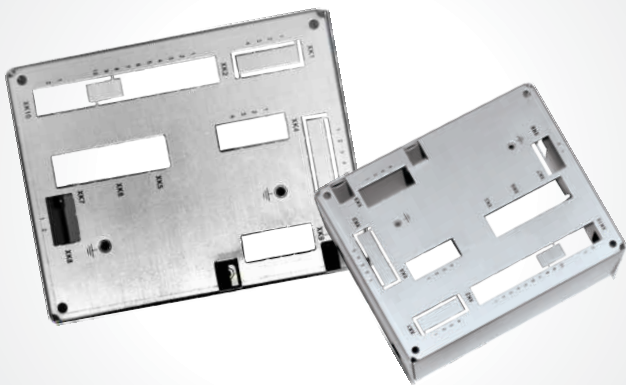

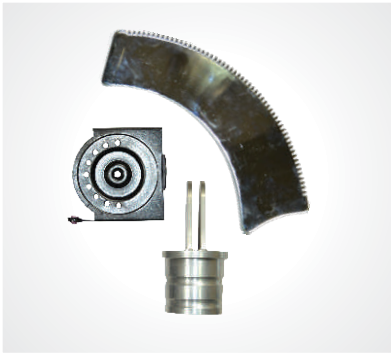

Expertise in fabrication of metal components for varied applications.
